

This is a great law. Too many laws are enacted which are restrictive or useless. This law has saved me so much anxiety and aggravation by not having to deal with the bombardment of sales pitches. Rarely am I interrupted during dinner. I no longer have to run to the phone not knowing who it is. IF my phone rings now, it is most likely someone I want to talk to. Please don't get rid of one of the best laws to have been enacted in the last 20 years.
